School Of Architecture

12th october, 2020

Figure 2: Event Photograph (Ar. Aniket Bhagwat)

Malik Mehrooz

The term "rural landscape" describes the diverse portion of the nation's land area not densely populated or intensively developed, and not set aside for preservation in a natural state. The rural landscape includes a variety of geological and geographic features such as cropland, forests, deserts, swamps, grasslands, pastures, rivers and lakes.
