## 1. Introduction of the Workshop:

This series of talks is an endeavour for the benefit of students of architecture, where faculty and industry experts are invited to give a master class on the topic of their expertise. It is open for students from all semesters to attend the session, post that they can interact with the expert in a question/answer session.

## 2. Objectives of the Workshop:

We started the Master Class series last year as a collaboration between School of Design and Architecture Manipal Academy of Higher Education Dubai and School of Architecture and Design Manipal University Jaipur. This year we have extended it out to international speakers from universities in Philippines and Georgia as well.

## 3. Beneficiaries of the Event:

- UG Students (Architecture, Design and Allied Fields)
- PG Students (Architecture, Design and Allied Fields)

## 4. Brief Description of the event:

### Session1:

Arch. Seno shared the different philosophies of legendary architects from around the world and how one should not stick to just one of them and understand their philosophies holistically in the context of the architectural project at hand. He explained the difference between a philosophy, a design concept and design considerations.

An Architects Philosophy is a mantra, and each mantra is unique and that was definitely a takeaway from his presentation as it simplifies the word philosophy in the architectural context very well.

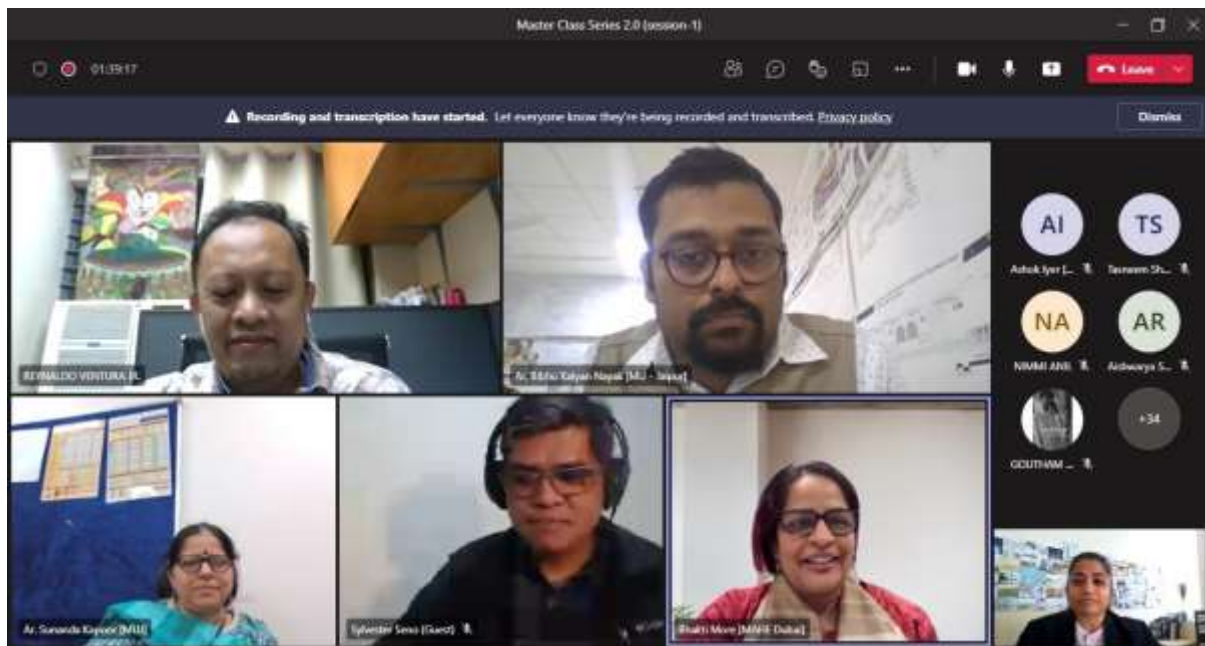

His session helped the students in opening up their minds and come out of various misconceptions or biases which they normally have in the architectural designing of a project.

### Session2:

An interesting presentation in a story format which kept the students stuck till the end. The session helped them understand how to choose their career paths after they graduate and how do they chart out this journey even during the duration of their academia through continuous professional development. His presentation has opened out a completely new world for them.

And a key takeaway from his presentation has definitely been one of the initial quotes he shared that said that- Investing in yourself is the best investment you will ever make, as it will not only improve your life but even the lives of all those around you.
