

## **ISA Chapter**

The International Society of Automation (isa.org) is a non-profit professional association founded in 1945 to create a better world through automation. ISA advances technical competence by connecting the automation community to achieve operational excellence.

### **Objectives:**

1. Increase technical knowledge in the field of automation and control
2. Develop the skills and hone our expertise
3. Share experiences, successes, and lessons learned
4. Build lasting friendships and professional connections

ISA Young Professionals (YP) is an inclusive community where young professionals can make an impact and influence the future of automation. They get opportunities to develop leadership skills, enhance their professional networks, and engage local and technical mentors. All these skills are necessary for students applying to jobs and internships. Students will also learn how to identify and work toward a shared vision, delegate tasks and responsibilities and work through interpersonal conflict. This chapter involves many industry personals which will help the students to direct contact with them and build their professional relationship to enhance their skills and also to get jobs in future.

### **How is it different from existing Chapter?**

The ISA Student Section, as one of the countless student section spread across India and the world, strives to promote the ISA community among students in the local arena, by helping them develop their technical skills and professional networks through the plethora of resources that ISA provides, including but not limited to:

- Access to our top-level technical library and research transactions;
- Exclusive access to specialized focus groups/divisions in specific fields including Robotics and Automation, Cybersecurity, and Education; and
- Networking and career-making opportunities with like-minded students as well as professionals.

Department of Mechatronics Engineering  
In association with  
International Society of Automation  
Manipal University Jaipur is organizing  
a National Webinar on

**CAREER PROSPECTS  
IN  
INDUSTRIAL AUTOMATION**

On 25th February, 2021 at 10am

SPEAKERS -  
**Dr Dattatray Sawant**- Assistant Professor, NMIMS, Mumbai  
**Dr Himanshu Patel**- Associate Professor, Nirma University, Ahmedabad
