1. Introduction of the Event

Basic Life Support (BLS) is a critical set of skills and actions that can be performed by bystanders or healthcare providers to sustain or revive a person's life in the event of a cardiac arrest or other life-threatening emergencies. BLS techniques primarily focus on maintaining an open airway, providing effective chest compressions, and ensuring proper ventilation, with the goal of oxygenating the brain and vital organs until more advanced medical care can be administered. The primary purpose of this training was to empower participants with the ability to recognize and respond effectively to life-threatening emergencies, particularly cardiac arrests. Participants learnt how to provide immediate care until professional medical assistance arrives, and in some cases, actions alone could be the difference between life and death.

In a world that urgently requires sustainable solutions, this training directly addresses the Sustainable Development Goal (SDG) set by the United Nations, particularly:

SDG 3 (Good Health and Well Being): To Ensure healthy lives and promote well-being for all at all ages.

2. Objective of the Event

- Understand the importance of early recognition and activation of the emergency response system.
- Develop proficiency in providing high-quality chest compressions.
- Acquire the knowledge to assess and respond to various emergency scenarios, including choking and sudden cardiac arrest.

3. Beneficiaries of the Event

Faculty Members of Manipal University Jaipur.

4. Details of the Guest

Dr. Ravi Prakash Chaudhary is the Associate Director and HOD of Emergency Medicine at Manipal Hospital Jaipur. He treats and devises diagnosis plans for patients from all walks of life and of all ages. He is very compassionate and empathetic for his patients. He has done MBBS from JLN medical College, Ajmer and Masters in Emergency Medicine from GWU-USA. He is having experience of 10 years in the field of emergency medicine.

5. Brief Description of the event

Introduction to BLS: The training commenced with an overview of the importance of BLS and its role in saving lives during cardiac and respiratory emergencies.

CPR: Dr. Prakash provided detailed instruction on performing cardiopulmonary resuscitation (CPR) on adults. He emphasized the importance of chest compressions, rescue breaths, and the correct compression-to-ventilation ratio. The training included hands-only CPR techniques, focusing on uninterrupted chest compressions to maximize the chances of survival.

Practical Demonstrations: Dr. Prakash conducted practical demonstrations, allowing participants to practice BLS skills on manikins and receive feedback on their technique.

Choking Relief: Dr. Prakash demonstrated techniques for relieving choking in conscious and unconscious adults, children, and infants.

Recognition of Heart Attacks and Strokes: Participants learned to recognize the signs and symptoms of heart attacks and strokes, along with the appropriate steps to take in these emergencies.

Chain of Survival: Dr. Prakash discussed the concept of the "Chain of Survival" and how each link in the chain is crucial for improving survival rates in cardiac emergencies.

Q&A and Scenario-Based Learning: The session encouraged active participation through interactive discussions, question-and-answer sessions, and scenario-based learning to simulate real-life situations.

10. Feedback report of the Event

The Basic Life Support training conducted by Dr. Ravi Prakash was highly informative and beneficial for all attendees. Participants left with a heightened sense of confidence in their ability to respond effectively to life-threatening emergencies. The comprehensive content, hands-on practice, and expert guidance provided by Dr. Prakash made this training a resounding success.
