A report on

Workshop on

How to Avoid Publishing in Predatory Journals

1st April 2022

Introduction of the Event

Research work is an indispensable part of academic life- be it a faculty member or research scholar. As many efforts and time, we invest in conducting research, it is equally important that our work get published in a quality journal. But nowadays the publication space is very crowded and lot many predatory and clone journals are there which lure us to get our work published in those journals. Not only does getting our research work published in these kind of journals makes our hard work go waste but also it followed by serious implications. So, in the pursuit of research journey, it's important to identify predatory and clone journals and how we can save ourselves, our research work to go waste in publishing in these types of journals.

Objective of the Event

The basic objective of this workshop is to identify predatory and clone journals, so that we don't fall pray and face serious implications.

Beneficiaries of the Event

All the faculty members and research scholars of Manipal University Jaipur.
